82mm

Pro-Video Square Filter

Available Sizes: 4"× 4", 4"× 5.65"

Haida Mist Black Filter

The Mist filter is a commonly used physical filter, the principle is the light through the uneven surface of the mirror scattering, so that the contours of the picture highlights more softened, producing a hazy feeling.

While the mist black filter on top of this can also enhance the details of the dark areas and will retain more dark. Besides, enriching the content of the picture while adding more possibilities for post-processing.
